- Pest Management Services Fumigation Services

PMS

FUMIGATION SERVICES

Fumigation is a kind of pest control in which the disinfection is done in a dry environment. This procedure, also known as **PHYTOSANITARY TREATMENT**, is widely utilized nowadays and becoming more popular in various market categories (especially when it comes to transporting goods through containers). **PHYTOSANITARY CERTIFICATE** are issued to indicate that consignments of plants, plant products or other regulated articles meet specified phytosanitary import requirements.

PMS FUMIGATION SERVICES are experts in vessel hatches services. Our technicians are fully trained in fumigation and have the corresponding certification form for containers. We are able to perform our expert vessel hatches services all over Pakistan. Thousands of shipping containers are shipped daily from all over the globe to port-towns and cities in the Pakistan, and, as some cargoes are a breeding ground for pests and insects. Agricultural and food products, leather goods, wood products such as furniture, raw materials and other goods are some of the cargoes imported into Pakistan that are a hotbed for insects and rodents, that means vessel hatches services are essential to importers and exporters.

OUR VESSEL FUMIGATION AGENCY INCLUDE

- Fumigation of shipping containers
- Venting of shipping containers
- Methyl Bromide

Food, Fruits and Other Bulk Commodities

Insects, pests and any other variant might cause huge economical loss to companies that are either importing or exporting grain, rice or other bulk commodities. Bulk commodities are always carried around in large containers and with the sheer size of those containers, it is easy to understand the devastating threat to the economy of such trade.

Vessels (Cargo) Fumigation:

The fumigation and pest control operations staff of Fumigation Services are highly trained in carrying out ship fumigation with Methyl Bromide. Fumigation Services fumigates huge volumes in export cargo carrying wheat, maize, rice, and other agricultural commodities by conducting hot gas procedures.

Storages, Warehouses & Pallets Fumigation:

Several categories of pests may be found in warehouses and industrial units, but the common types of warehouse pest control services can be grouped into three: birds, insects and rodents.

Shield can oversee the essential task of inspecting, proactively monitoring and ultimately controlling any pest problems in production areas, warehouses and depots.

The result of cross-contamination by pests in these locations can be the transportation of insects or rodents to multiple end users, such as factories, shops or members of the public.

PMS FUMIGATION SERVICES will provide your factory and warehouse storage units with tailored, effective and discreet pest control solutions. We help safeguard each businesses reputation with staff, clients and visitors. Our company has an enviable reputation based on their knowledge and over 10 years of experience in this sector.

We appreciate that industrial and warehouse pest control is an integral part of any applicable business routine maintenance procedure. It is a key requirement in order to pass business audits for licensing and accreditation.

PAK PANSY FUMIGATION SERVICES has conducted national and international administrations in numerous aspects of nutrition organizations, shelter, healing centers and home areas to ensure a safer, infestation-free and isolated environment.

Our goal was to provide our customers with the best solutions for pest problems. We have experience in fumigation of groceries, rustic environments, vehicles, import and export, and we compel our client's organizations by treating their holders, production lines, distribution centers, homes and supplies fresh from insect infestation.

Container Fumigation

Our Fumigation Services have fumigated huge volumes of export cargo containers which comprises of wheat, maize, rice, and other agricultural commodities by carrying out hot gas procedures.

Pakistan's implementation of the Khapra beetle rules, it requires containers imported from 40 countries across Europe, Asia, the Middle East, and Africa to be fumigated to prevent the migration of Khapra beetles into Pakistan.

The fumigation and pest control operations staff of Fumigation Services are well versed in carrying out vessel fumigation with Methyl Bromide

This need to be treated either using methyl bromide, heat treatment, or pesticides and to be issued with a valid certificate before leaving the port of export.

Warehouses and Lots Fumigation

Several categories of pests may be found in warehouses and industrial units, but the common types of warehouse pest control services can be grouped into three: birds, insects and rodents. Shield can oversee the essential task of inspecting, proactively monitoring and ultimately controlling any pest problems in production areas, warehouses and depots. The result of cross-contamination by pests in these locations can be the transportation of insects or rodents to multiple end users, such as factories, shops or members of the public.

PAK PANCY FUMIGATION SERVICES will provide your factory and warehouse storage units with tailored, effective and discreet pest control solutions. We help safeguard each businesses reputation with staff, clients and visitors. Our company has an enviable reputation based on their knowledge and over 10 years of experience in this sector.

We appreciate that industrial and warehouse pest control is an integral part of any applicable business routine maintenance procedure. It is a key requirement in order to pass business audits for licensing and accreditation.

When it comes to talk about having a high-quality PET bottles in Pakistan, **PMS INDUSTRIES** is the only name to rely on. We are one of the ***finest leading manufacturers of pure-quality PET bottles.***

Providing quality product is the ultimate goal at PMS Industries. From our standards and processes to our engineering and manufacturing, we've put numerous checks and balances in place to ensure every bottle is produced with the highest level of quality

What is PET?

Polyethylene Terephthalate is known commonly as mostly PET or sometimes PETE, is well known for its clear feature for water or other drinks. PET is a thermoplastic polymer belongs to the polyester group. PET is created by the esterification of Terephthalic Acid and Ethylene Glycol. As a raw material, PET is famous as a safe, no-toxic, strong, lightweight, 100% recyclable flexible material.

Molecular Structure of Polyethylene Terephthalate
PET Chemical Formula: $(\text{C}_{10}\text{H}_8\text{O}_4)_n$

SHOWING YOU OUR DIFFERENT SIZES AND SHAPES OF PET BOTTLES WE CREATE:

PET BOTTLES FOR OILS:

CONTAINERS and SPRAYERS:

HOW WE WORK WITH OUR TECHNOLOGY:

BLOW MOLDING

Our diverse facilities allow us to blow mold bottles ranging from any specification to just a few ounces with a variety of finishes. Our equipment allows us to manufacture plastic blow molded products ranging from medical and consumer goods, to containers, automotive and industrial applications. Our company offers numerous types of resins, ranging from commodity resin such as High Density Polyethylene (HDPE), Low Density Polyethylene (LDPE), Polypropylene (PP), and engineering resin such as K-Resin, PETG, and Polycarbonate, to name a few.

INJECTION MOLDING

Our professional teams of designers and engineers work together to build mold tools that are capable of producing high-quality plastic parts. With years of development, we accumulated rich experiences in complex injection molds with complicated structures and large sizes. To separate from other molding companies, we provide site maintenance and online support.

PMS

INDUSTRIES MULTAN

PMS INDUSTRIES MULTAN focuses on production pesticide sampling and completely concentrates on the goods associated with insecticides except serving different markets.

Over the years, the intention of the method and packaging efforts at insecticides groups has been to offer a product that maximizes the capacity of the energetic component to manipulate a goal pest in a safe, reliable, and cost-powerful manner. The feature of pesticide method and packaging these days is converting unexpectedly in reaction to a huge variety of things now impacting the rural chemical industry.

Our Products:

Pesticides bottle 250ml, 500ml, 1L

White GA Container, Use for Storage powder packaging

Star type HDPE Pesticides Bottle

Pesticides Container 5L

Pesticides Drum 20L, 30L and 200L

PMS

APPAREL INDUSTRIES

----- *Quality Never Goes Out of Style* -----

ABOUT US

We are one of the top Pakistan's manufacturers of trendy knitted apparel, mastered in fleece hoodies, cotton jackets, sweat shirts/pants, t-shirts.

PMS

Safety Services Consultancy LLC

WHY US!

PMS SAFETY SERVICES CONSULTANCY LLC

achieve excellence in delivering services according to the call of our profession. Our vision is for our company to be globally synonymous with excellence and trustworthiness. We are proud of the consistent high quality of our services and the integrity with which we conduct ourselves, and we want to be known for this. We want grow into the leading provider of inspection services for commodities.

PRE SHIPMENT INSPECTION:

Pre-shipment inspection is a step in freight shipping that allows you to fix any issues without receiving and paying for the product; since inspectors examine items before shipping, you can hold the final payment until you get the report. These procedures only occur once 100% of the ordered units are produced and 80% are packed to eliminate the risk of only checking cherry-picked samples.

BENEFITS FOR CHOOSING PMS

- Compliance of the specification
- Minimal risk
- Enhanced Customer Confidence
- Great acceptance rate at very reasonable cost
- Quality Control
- Checking of packaging integrity to avoid costly damage during transits
- Confirms Quantitative verification
- Improved Product Quality
- Rapid response customer care
- Most Importantly, Punctuality. We never lose the track of time

- Semi-private sector

PMS PACKAGES is an all-in-one packaging platform for businesses. We use the power of science, art and technology to enclosing or protecting products for distribution, storage, sale and use.

We empower thousands of customers to grow their business and brand with custom packaging products by leveraging our design technology, customer success support and design team.

PACKAGING SERVICES:

Operations should be smooth and hassle-free. PMS Packages offers a range of packaging services that allow customers to focus on their core products and processes to grow their business. Packaging, kitting, storage, just-in-time delivery are examples of services that we tailor to meet the specific needs of our customers.

Our Main Focus

COST EFFECTIVE:

With our packaging services, you can focus on your core operations and free up valuable warehouse space.

HANDLING:

We take full charge of the packing and handling process, allowing you to assign labor elsewhere.

SIZE THAT'S MEET YOURS:

We know that every business faces different challenges and that there is no one-size-fits-all solution, so our services can be tailored to your specific needs.

OUR PACKAGING SERVICES INCLUDES:

LOGISTICS

When? On time!

How? In an optimum manner!

How? According to customer's request!

The foremost motive of our supply chain is to satisfy consumer expectations, at finest price conditions.

We supply the products with inside the ordered quantity, we meet the desired shipping conditions, on the agreed time and time and in remarkable conditions.

We have the advantage of having our own paper mill, which gives us flexibility, controlled quality and continuity in supply.

Thus, the discontinuity of packaging production due to the lack of raw materials is virtually zero.

The attitude and competence of our colleagues involved in the supply chain are directed towards fulfilling our customers' requirements.

The process of delivering finished products is characterized by flexibility, fairness and seriousness. We offer Zach client several solutions:

Customized palletizing according to the requirements and adaptability based on the changes required by customers to fit with their own manufacturing flow.

Just-in-time delivery through warehouses located near customers' production locations

Vendor managed inventory – ensuring constantly balanced stocks with customer requirements and planning.

Managing central or local warehouses for large customers for flexible delivery times and supply volumes.

Outsourced transportation, assured with reliable partners and machines tailored to the specifics of our activity, approx. 75% of the shipments take place with a dedicated fleet.

For a rigorous control of distribution costs, we provide both complete trucks at delivery and the use in parallel of grouping solutions in order to be able to deliver smaller quantities of goods, depending on the needs of our customers or our customers' emergencies.

Deliveries are made with trucks of different tonnages in order to fit within the limits imposed by local traffic restrictions.

We are always oriented towards evolution, so we work without getting tired to improving our services. Why? The needs of our customers matter and we want to offer satisfactory quality services.

ENGINEERING AND DESIGN

Packaging is a process that requires particular attention, the packaging being the first to impact on the final customer.

For some more original and creative packaging, our colleagues design and prepare an exceptional graphic design.

RAW MATERIALS

Have you ever wondered which procedures necessary for producing the boxes you see on the shelves?

A sheet of paper or cardboard is made from cellulose fibers. These fibers are mainly extracted from recycled wood or paper and board.

Wood comes mainly from forests, from forestry cracks, as well as from timber, carpentry, furniture and construction.

Recycled paper and cardboard (paper and cardboard waste) have various origins: the industry (from paper or cardboard processing processes, industrial and commercial packaging, unpublished newspapers, office products, etc.) and household (old newspapers, household packaging, etc.).

Auxiliary materials (fillers, additives ...) can be added during paper making to help improve paper.
